

We're hiring a Product Designer

SnapScan is currently looking for awesome people to join our team. For more information on the company, have a look at [Offerzen company profile](#)

In this role you will play a key part in fulfilling SnapScan's product vision, mission and business objectives. We are on a mission to design and deliver valuable products for both our merchants and users and we looking for an individual with a passion for product, ux, ui and people, to help us get there.

If you are interested, please direct all responses and queries to jaime@snapscan.co.za

What you'll do

- You will be part of the product team which looks after all SnapScan products that are merchant and user facing.
- You will be defining user experience and user interface problems and designing solutions for them for existing and new products.
- Design user flows/journey's, information architecture, low fidelity, high fidelity and interactive prototypes.
- Communicate with product managers, dev, marketing and other internal teams and stakeholders to ensure that the final design solutions are solving the problems identified and meeting the needs of customers.
- Facilitate or be present in design sprints, user interviews and usability testing.
- Work with the research team to analyse quantitative and qualitative data, market trends, competitor analysis, user interview insights and other research inputs before designing any solutions.

Who you are

This role requires a unique set of skills and attributes. All people are different, but we believe that if the following described you, you will be well suited for this position:

- 2+ years of experience in user experience and user interface design
- Passion for technology, user experience and user interface design.
- Passion and empathy for product and people.
- Enthusiasm to understand customer needs and problems and design solutions.
- You are comfortable with the following tools and software, adobe suite, (including adobe XD), as well as sketch, figma, abstract, miro and inversion.
- Comfortable communicating with internal stakeholders.
- You are detail-oriented and process-driven and enjoy solving problems.
